SAYS KREUGER STOLE \$50,000,000

GOV.-GEN. OPENS CONFERENCE

CURTIS GETS ONE YEAR AND \$1000

VERIGIN WILLING QUIT CANADA

MALONE KILLS GRASSHOPPERS

FOREIGN TRADE RECORD IS SET

The Irving Trust Company of New York, trustee in bankruptcy, alleged in a motion filed in Federal Court that Ivar Krueger, Swedish Capitalist, stole \$50,000,000 in bonds of the International Match Company, while he was its president. He committed suicide last March in Paris.

OTTAWA, July 21.—The Governor-General of Canada opened the Imperial Conference in Ottawa this morning. His Excellency read a message from the King. Privy councillors, senators and members of parliament, together with overseas guests, are admitted to the galleries of the House of Commons for the opening only.

PHILADELPHIA, N.J.—A penalty of one year's imprisonment and a fine of \$1,000 was imposed today on John H. Curtis, for obstructing justice in the Lindbergh baby kidnapping. Immediate steps were taken to appeal the case. Curtis stood with his hands behind his massive head, and stared stupidly as the sentence was pronounced. Then he went back to his cell in the jail.

Peter P. Verigin is willing to leave Canada for Mexico and take the whole Doukhobor community of Universal Brotherhood with him to settle in that country if he is released on parole by the Federal Government.

This statement was made by John MacDougall, general manager of the American Colonization Company of New Jersey, which controls 500,000 acres in Mexico. Mr. MacDougall is interviewed Verigin in Prince Albert last Monday and said he received assurance of the Doukhobor leader to this effect:

Nature, the producer of the disastrous grasshopper invasion of South Dakota, is making amends. Giving man a "break" in the insect war, a strange malarial day is striking the insects down by the millions in the vicinity of Crow Creek, in Jerald and Buffalo counties, while the farmers are making every effort to spread the flies. Although the exact nature of the disease has not been determined, its virulence is shown by the report from one of the farmers which says that millions of the grasshoppers were found dead in one field, clustered in groups and still clinging to stems of vegetation.

Exports of Canadian products in June had a total value of \$46,545,496, which was the highest for any month this year. The increase was \$1,338 over May and \$13,949,734 over April. These figures were given in a statement issued recently by Hon. H. H. Stevens, Minister of Trade and Commerce.

The total exports were \$41,791,075 and the imports \$46,748,465, which leaves a favorable balance for the month of \$5,957,390.

The exports for the 12 month ending June 30 totalled \$516,235,000, and the imports \$516,235,000, leaving a favorable balance of \$31,038,057 in an aggregate trade of well over one billion dollars.

A silly young girl. Drink a bottle of ink. To quiet a thyringy ambition. And before the kid knew what to say, or do, He was on the way to perdition. All help they gave up. For the poor poisoned pup. His fever grew hotter and hotter. But the Van Kins. A reassured old duck. Saved his life—with the aid of a better. Give Your Fountain Pen A Chance by using the Write Ink

BIG STAFF MARK EXAMIN PAPERS AT EDMONTON

Examination Results Will be Known Soon After July 25

EDMONTON, July 20.—Fully 17,000 Alberta students who wrote 13,000 examination papers in the Department of Education tests in the latter part of June, will know their fate during the week of July 25, according to Hon. Percy Breakey, Minister of Education. Marking of papers is now under way at the Edmonton Normal School, where a specially selected staff of teachers is at work.

It is expected that marking will be completed by Wednesday of next week. On Friday of next week, the Board of Examiners will meet under the chairmanship of Dr. John T. Ross, Deputy Minister of Education, to give final approval to the work of the markers. Then early in the following week, the results will be released for publication.

The grades pertaining in the 17,000 writing are 10, 11 and 12.

The examinations will meet under the chairmanship of Dr. John T. Ross, Deputy Minister of Education, to give final approval to the work of the markers. Then early in the following week, the results will be released for publication.

Encourage Sport

THE STAY-IN-TOWN CHILD

"Naturally," say many parents, "we heavily advise the children who are so camp. It's the best possible vacation. But if we can't send them this year, if we can't even take them out of the city, what then?" There is an answer to the "question" playgrounds. With a completely equipped and well-supervised playground in the neighborhood, children in cities or suburbs have ample opportunity to play—and after all, play in the modern sense is a requirement of a happy and normal second year to a congenial and wholesome home environment.

A prominent leader in St. Louis estimated that it cost \$48 to keep one juvenile delinquent in a reform school for a year. So St. Louis has decided that it would rather use similar sums of money at the beginning of the summer to provide adequate ground facilities for many children than to spend in the end of the year to keep a few children who have been too active for their environment.

Other cities have noticed also a close relation between delinquency and scarcity of playgrounds, and are attempting to right the condition. They are aware that the summer months are the most successful for the work of providing children and young people with outlets for wholesome activity.

Playground activities are many and varied. Supervised athletics and games make up a large part of the program. There is also informal play, such as games, musical education encouraged by group singing, orchestra, club, clubs and nature hikes, garden and dog work, etc. In informal small groups or large, parents, fill the busy hours of the playground child's day.

When it is considered that one-quarter of a child's life during school age is spent in vacation and that the use of leisure is becoming increasingly important in adult experience, the value of playground instruction is still clearer. Along with the slogan "more camps for children" there should be, for no other reason than this, as equally large a plan for "More and Better Playgrounds"—Christian Science Monitor.

The Garrison Cottage took a big load of oil drilling equipment through Strathmore, enroute to the proposed drilling site at Steeleville north of Bassano on Tuesday. While here the R.C.M.P. checked up the load and found it over three hundred pounds overweight, which was unloaded here before going east—Strathmore Standard.

FARM WOMEN'S WEEK AT OLDS

The Olds School of Agriculture has again arranged an interesting program for Farm Women's Week, July 21 to 24th inclusive. Those who have attended in previous years have spent a profitable holiday and pleasant surroundings. General lectures and demonstrations are given each day by staff members, and time is provided for rest and recreation. Those attending live in the school dormitory, where board is provided at \$1.50 per day. There are no fees of any kind, and all women are made welcome. Many of those attending represent women's organizations, but any one is entitled to go even although they do not belong to an organization. A program will be given on request.

HANNA PLAYS TENNIS HERE ON SUNDAY

Club From That Town Makes Good Showing Against Local Club

DISTRICT TOURNAMENT AUG. 7-8

The Hanna Lawn Tennis Club were victorious at the Carbon Club on July 17th and provided the Carbon Club with the strongest opposition it has had this year. Victory finally rested with the Carbon players by five sets to three, but considering that the Hanna players had driven eighty miles over rough roads to play this match, they are to be congratulated on their fine showing. The Hanna ladies especially did well, taking the ladies' singles and ladies' doubles. The singles between Miss D. Neff, Hanna, and Miss Mabel Ramsay of Carbon, was the feature match of the day, forty games being played. This match lasted over two hours, before it finally went to Miss Neff.

The following are the results and scores: Men's Singles—A. Birch of Hanna defeated W. Paxon of Carbon, 6-1, 6-3. W. Edwards of Carbon, defeated H. Birch of Hanna, 6-2, 6-1.

Ladies' Singles—Miss D. Neff, Hanna defeated Miss M. Ramsay of Carbon, 6-4, 6-1.

Boys' Singles—N. Nash of Carbon defeated C. Birch of Hanna, 6-1, 6-3.

W. Edwards of Carbon, defeated H. Birch of Hanna, 6-1, 6-3.

W. Paxon and J. Stence of Carbon defeated H. Birch and R. Donair of Hanna, 5-4, 6-4.

Ladies' Doubles—Miss P. Carter & J. Blair of Hanna defeated Mrs. Willoughby & Miss Hemmings of Carbon, 6-1, 6-1.

Mixed Doubles—H. Ramsay and Miss W. Ramsay of Carbon defeated H. Birch and Miss Neff of Hanna, 6-5, 6-2.

District Tournament

The Carbon Lawn Tennis Club are arranging for an invitation District Tournament, to be held on August 7 and 8. The following clubs will be invited to send competitors: Acme, Crossfield, Grimsley, Carbon, Drumheller, Drumheller South, Rockford, Rockford, Strathmore, Truich, Swallow and Three Hills.

The events will be: Men's singles and doubles, men's and ladies' doubles. If the weather is favorable, this will be the biggest tennis in town since the summer season. The event should prove a great attraction to all those interested in the game. Entries have to be made to W. A. Breidher, secretary, by 6 p.m. August 5th.

Suitable prizes will be given, including two silver cups which will be donated by two prominent sportsmen in Carbon.

Heath Club to Play Here on July 21st. The Heath Lawn Tennis Club are expected at Carbon on July 21st, to play a match with the local club.

At Blaisy Camp, England, Sept. 1. A. Jensen of Inland is among the best scorers in the British Empire for marksmanship. Seven Canadians, led by Regal Jensen, entered the second round for the challenge cup. Jensen's score in the first stage was 65 out of 70, but by one point by two other English marksmen.

Swalwell Wins Softball Games

Two games of softball were played at Carbon on Sunday afternoon between the Swalwell and Carbon teams. Swalwell team won both games by large margins. In the first game the score was 41-15, and was full of errors by both teams, the only good play being a triple by Carbon in the sixth.

Line-up of this game was—Carbon—Furcotte, W. Reid, A. Paxon, W. Kinsland, S. Reid, Louis, P. Dvick and Murray.

Swalwell—A. Gore, Tricker, Gibson, Harry Beatty, H. Lammie, W. Gore, Gregory and McNeill.

In the second game Swalwell again fielded practically the same team and were victorious by a 24-12 score. The Carbon line-up for this game was as follows: Kinsland, A. Paxon, Mack, Mullin, W. Edwards, H. Ramsay, Louis, Murray and McNeil.

JOE E. BROWN HAS HEAL

"HEAVY" SUPPORT IN THE COMEDY "THE TENDERFOOT"

There is no doubt in the mind of Joe E. Brown that his latest First National picture "The Tenderfoot," which comes to the Carbon Theatre last night, will be a howling success—because, says Joe, he has the heaviest support of his whole career.

Which is just another way of referring to Robert Greig, the English actor, who plays the part of a Broadway producer in Joe's picture. When Joe says "heavy support" he means it literally. Greig, who stands six feet, one and one-half inches in his stock feet, always gets his pants worth on a weighing machine. He can make the indicator go all the way to 315 and he looks every ounce of it.

Joe discovered that it takes five and one-half yards of material to make one of Greig's suits, whereas Joe is completely clothed in three and one-half yards. Greig's trousers alone require two and one-half yards.

He has a waist line which measures 51 inches, and these fifty-two and a half inches.

As Joe E. Brown put it, "we certainly get a bargain. That's a lot of stuff for that amount of money."

Speed Boat Record

KAYE DON BREAKS WORLD'S SPEED BOAT RECORD AT 120 MILES AN HOUR

In a second run over the Loch Lomond course on Monday, Kaye Don broke his new world's record made earlier in the morning. He averaged more than 120 miles an hour on the second run, eclipsing the record of Ray Wood, the United States' driver, by about 10 miles an hour.

In his first trial with the new boat, Miss England III, Don set a new record of 117.4 miles per hour over the two-way course.

The first run from the south to the north end of the course, was made at a speed of 117.4 miles per hour and the second run, from the north to the south end, at a speed of 117.6 miles. The boat was launched at 5 a.m. and Don was in command and started the engines at 5:15. Arthur Irish, appointed by the motorizing Association to supervise the attempt, signalled that the course was clear, and the course was run over, resulting in all the record being made.

CHRONICLE TO ISSUE SPECIAL ON AUGUST 4

On August 4, The Carbon Chronicle will issue a special number. This issue will contain historic facts about Carbon, as well as other items of interest. Views of some of the business places and mines will be shown and the facts in general will be a boost for Carbon.

All business places have been asked to advertise in this special issue, and most local concerns have agreed to do so. To any others who desire to use this special edition of 2000 copies as an advertising medium, we request that they communicate with us immediately. All advertising copy must be in this office by August 21st to insure insertion.

To the advertising districts, we ask some reader in each locality to send in local news for this issue and later than August 2nd, so that their district may be represented by some live news on this occasion.

This issue will also be a splendid advertising medium for our own machinery, household goods, tools, etc., that with the assistance of a number of two cents per word will be made for this advertising medium.

Any person desiring extra copies of this issue are asked to place their orders before publication. These complimentary copies may be printed if necessary.

Prices on Twine to be Reduced

BINDER TWINE CHEAPER THIS YEAR

Binder twine for the present harvest is at the lowest price in about 10 years. United Grain Growers' sources announce that quotations are 34 cents under last year. About 75,000 pounds will be necessary if the straw continues as heavy to the end of the month as is now indicated. The price will range between 8 and 9 a pound, whereas 14 and 15 has been the rule, and 26 during the war years.

ALBERTA NEWS

A net profit of \$228.48 was shown in the report of the Dominion Day sports program for the month of July 8.

Forest fire situation in Alberta is reported to be fairly good. Campfires are asked to be kept under strict supervision, as the fire is dry.

The Mayor and Council Committee of Three Hills were delegated to go to Drumheller and interview the Union Power Company regarding the street lighting equipment and the minimum service charge, with a view of having some reduced. Three Hills Council.

The Barried News tells the following incident: "Chas. Buehler shipped a cow to the Edmonton stockyards."

"The cow weighed 560 lbs., price \$2.00 hundred pounds; value of cow \$4.00. But Mr. Buehler did not set a check for \$4.00, and he was short of \$4.00."

"The cow was sold for \$4.00, and the balance of \$4.00 was paid by the following insurance: \$3.00; stockyard; \$1.00; reading \$4.00; commission, \$2.00; trucking \$4.00; cash on hand, \$4.00; making a total of \$6.00, which subtracted from \$4.00, left \$2.00—the amount received for the cow."

Tree Planting On Prairies Solves Remedy For Soil Drifting And The Conservation of Moisture

Extensive tree planting alone can save Saskatchewan from the fate which has overtaken the Sahara desert, according to Capt. Richard St. Barbe Baker, who passed through Winnipeg, on his way from the Peace River country to Toronto. As late as the time of Mohammed, Capt. Baker said, the Sahara was a well-wooded and fertile area. Then came a great influx of Arabs who, like the settlers of the western plains, cut down the trees and began farming operations. The result was to convert the once rich African plains into an arid and unsettled tract, unfit for human abode.

One of the first hundred students to attend the University of Saskatchewan before the war, Capt. Baker is now completing a tour of Canada, he had not been seen for years. He was delighted with the appearance of Manitoba, where tree protection has been evidently encouraged growth. But in Saskatchewan he noted the serious effects of the planting of trees and his prediction for the future upon his study of the past.

Tree planting on all rising ground, Capt. Baker declared, was the only remedy for this state of affairs, which was resulting in a changed climate, soil drifting and desertification. He urged upon Western Canada the adoption of the policy in force in New Zealand, where forestry was being made to pay.

In that country one private company had already sold \$4,000,000 of "forest bonds." The money was invested in tree-planting and it was believed that in 12½ years return on the investment could be expected. In New Zealand the adoption of the policy in force in New Zealand, where forestry was being made to pay.

Revenue From New Taxes

Saskatchewan Tax on Passenger and Freight Public Vehicles
Saskatchewan will collect between \$20,000 and \$25,000 a year in new taxes levied on passenger and freight public vehicles.

Under public utility board regulations, the government will collect one per cent. of the gross earnings of vehicles operating for gain under the jurisdiction of the new utility board.

Paid For Shaving

Central, Wash., takes shavers seriously. Frank McDowell, a business man, was fined \$25 and his attorney \$10 in police court for violating an ordinance requiring all male residents to go unshaven until after the pioneer celebration, August 3 and 4. McDowell's only defence was—"The lady friend doesn't like whiskers."

Perquisites are not related to husbands.

"Pardon me, but can you let me have a light?"—Moustique, Chartered.

W. N. A. 1933

Echo Of The War

Lloyd George Not Improved With Value Of The American Forces
Newton D. Baker, President Wilson's secretary of war, has revealed that David Lloyd George, then Premier of Great Britain, at one time apparently desired the removal of General John J. Pershing as commander-in-chief of the American Expeditionary Force in the Great War.

At a letter to Colonel Lloyd C. Griscom, former liaison officer between General Pershing and the British War Office, Mr. Baker wrote that the war-time premier complained the United States army was "perfectly useless" to the British forces and was on the verge of asking for General Pershing's recall.

At the conclusion of a dinner in London in 1918, Mr. Baker wrote, Mr. Lloyd George "with vehement emphasis, complained that the United States army in France was of no service to the British at all in spite of the fact that it was the only army in France which was not completely stripped necessary service of supplies in order to carry the United States to France, and that they had scarcely gotten to France before General Pershing pulled them away from the British and took them into his own custody on another part of the line."

"This description was most earnest and vehement, resulting in the final declaration of Lloyd George that so far as Great Britain was concerned the American army was perfectly useless and the ship service devoted to bringing them over wasted."

Mr. Baker replied that from his own observations on the front lines he was convinced that the American troops were "at least detaching that many German divisions which might otherwise be added to the concentration against the French and British."

He countered with an offer to discontinue the transportation of American soldiers on British ships and move only such forces as could be carried on American vessels.

The next morning, Mr. Baker received a letter from the British ambassador in London, stating that Mr. Lloyd George "asked me to say to you that you should think no more about the matter which he raised for discussion last night at dinner."

The Pendulum Clock
A pendulum clock gained, owing to the increase of gravity with latitude, about one minute and twenty seconds a day when taken from Ottawa to the mouth of Mackenzie River, North West Territories, by an official of the Dominion Observatory, Department of the Interior.

It was found that the clock gained about five thousand feet up a mountain side in British Columbia. It lost about thirteen seconds daily.

Well Covered
"I'm sorry," said the diner who hoped to get away for it, "but I haven't any money to pay for that meal."

"That's all right," said the cashier. "We'll write your name on the wall and you can pay the next time you come in."

"Don't do that. Everybody who comes in will see it."

"Oh no they won't. Your overcoat will be hanging over it."

A hydro-electric station is to be constructed on the Jordan river.

KING'S GRANDSON TRIES HIS LUCK

His highness, Prince George, grandson of King George V, was caught by the camera as he tried his luck at the Marlborough House Garden Party. He is fishing for fish in the "pond" and must land a fish with his magnetic hook to be in the money.

361

UNDOUBTED SLIMMING LINES

Suitable for normal as well as larger figures
A dress is a dress so smart and so slenderizing at the same time. It has a subtle air of youth. It's the fascinating one-sided reveal collar that bows at the opposite shoulder that does it.

In the original dress of black and white crepe silk, the vest, belt and buttons were also of the white crepe. The scalloped outline at the lower of the revers is particularly modish and minimizes belated blue-gray.

This dress in plain navy blue crepe. Size 36 requires 3½ yards of 39-inch contrasting.

Batiste prints, sheer linen twill, sportweight linen and tub silks are smart for summer wear.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

How To Order Patterns

Town

Albury, Australia, has banned all dog racing.

Turnip sauerkraut is a new, appealing food.

The small windshield on the fuselage ahead of him became clouded with moisture. He put his arm from the cockpit to wipe it. Air swept back by the propeller rushed up the sleeve of the slicker and lifted the garment out like a balloon and lifted the pilot from his seat. He asserted he saved himself from being blown away by tucking his head about the instrument panel. Little things like shoes making no difference to a man in real need.

As it was, it was had enough for there was nothing he could do and momentarily he expected to be whirled away from the machine completely.

Then with a loud rapping the slicker gave way, ripping completely up the back, and a faint and weary groan came from his place at the controls with a sudden thump.

Helpful Evidence

A critical moment in a court case had arrived.

Counsel for defence rose and pointed his finger at the man in the witness box.

"Now, sir," he commenced, "the whole evidence hangs on the destroyed letter. Think before you answer. What did the postmark say?"

The witness went through the actions of deep thought.

"I remember," he said at last. "The postmark said: 'Every home needs a telephone.'"

Sharks are cannibals of the sea, feeding on their fellows when conditions are favorable.

New Photographic System Developed In London May Mean Virtual Revolution Of Art

Songs Of Yesterday

Old Favorites Have Strong Appeal In This Modern Age

It used to be theory of those who construct radio programs that music composed further back than the day before yesterday was old-fashioned and unattractive to the demands of an up-and-coming age. Now the program magnates are less sure of this.

The directors of a feature called "Today and Yesterday," offered by a New York station, invited their audience to specify their favorite music. Six thousand replies were received, 614 songs were suggested, and with 513 ballots was estimated. It was found that "The Road to Mandalay" was the most popular, followed by "The Road to Mandalay" and "The Road to Mandalay."

Of the seven songs receiving the largest number of votes five were old and only one was really new. Second place was won by the first old ballad, "When you and I Were Young, Maggie," which was written in 1840. "Parade," a melody of 1899, was third in the voting; fourth was "Old Man River," composed five years ago; and then came "Let Me Call You Sweetheart," written in 1910.

The explanation of the new process is so simple that even the uninitiated layman can grasp it easily. One reason why we cannot see far in miles or many centuries is because the light is scattered, diffused, and the humidity in the atmosphere. It is also scattered on a fine day, but red light is not so much scattered. The problem has been to use the infra-red light in the atmosphere and to exclude all other light. This has been accomplished by using a piece of dyed gelatin in front of the camera lens as a filter. This permits the proper rays alone to penetrate and to carry the image to be photographed with them. This infra-red light is invisible to the naked eye, but infra-red sensitive plates respond to it, and by their use and the use of the filter photographs can be taken which the naked eye cannot see.

What fascinating vistas are thus made possible to the photographer may easily be imagined. A new art in effect has been created by this simple invention which achieves so marvelous a result. Its bearing in the fields of photography is so important that it is likely to follow as a natural corollary. But in so far as the art of photography is concerned, now has a new resource from which he may draw hitherto unimagined beauty for the detection of those who love nature in all its forms.—Montreal Star.

Albion Aviator Has Unusual Experience

Is Outfitted Now That the Unexpected Sometimes Happens

Out of the other comes the story of the Alberta flyer who is thankful that slickers are not made too strong. He is a stout gentleman who, in the cockpit of a machine quite snugly. He has flown for thousands of hours with care, caution and safety. He has been a hard factor to the best possible point and had laughed loudly at those who said that the unexpected is always lurking around the corner.

When the snow vanished he soared away his fur flying suit and secured his normal dress. He was a little slicker, however, he said, to comfort any man against the Alberta rains.

Recently this pilot was flying over a lake when a sudden gust of wind raised his plane.

The small windshield on the fuselage ahead of him became clouded with moisture. He put his arm from the cockpit to wipe it. Air swept back by the propeller rushed up the sleeve of the slicker and lifted the garment out like a balloon and lifted the pilot from his seat. He asserted he saved himself from being blown away by tucking his head about the instrument panel. Little things like shoes making no difference to a man in real need.

As it was, it was had enough for there was nothing he could do and momentarily he expected to be whirled away from the machine completely.

Then with a loud rapping the slicker gave way, ripping completely up the back, and a faint and weary groan came from his place at the controls with a sudden thump.

Helpful Evidence

Sharks are cannibals of the sea, feeding on their fellows when conditions are favorable.

A suggestion for dental attention—Mocha, Warsaw.

Science is ever amazing the individual. No sooner does one marvel about humanity than it becomes a commonplace beside its successor, until it would seem that the world could be surprised no more. Yet science must have many more miracles upon its sleeve. One has just been revealed in London that appears to be a virtual revolution in photographic art. It is nothing more or less than the photographing of the invisible. A camera was set up in Old Park, Dover, and despite the fact that haze hid the French coast from view, the printed picture showed a vast range of that coast in extraordinary detail.

The importance of this achievement in photography can hardly be overestimated. It simply means that whereas the photographer has hitherto been at the mercy of the weather, he is now able to take his picture in haze and go ahead with his work as though they did not exist. The new system enables the camera to penetrate into the atmosphere, where the actual thickness of the atmosphere prevents the photographer from seeing with his own eyes, and as such detail as though the atmosphere were absolutely clear.

The explanation of the new process is so simple that even the uninitiated layman can grasp it easily. One reason why we cannot see far in miles or many centuries is because the light is scattered, diffused, and the humidity in the atmosphere. It is also scattered on a fine day, but red light is not so much scattered. The problem has been to use the infra-red light in the atmosphere and to exclude all other light. This has been accomplished by using a piece of dyed gelatin in front of the camera lens as a filter. This permits the proper rays alone to penetrate and to carry the image to be photographed with them. This infra-red light is invisible to the naked eye, but infra-red sensitive plates respond to it, and by their use and the use of the filter photographs can be taken which the naked eye cannot see.

What fascinating vistas are thus made possible to the photographer may easily be imagined. A new art in effect has been created by this simple invention which achieves so marvelous a result. Its bearing in the fields of photography is so important that it is likely to follow as a natural corollary. But in so far as the art of photography is concerned, now has a new resource from which he may draw hitherto unimagined beauty for the detection of those who love nature in all its forms.—Montreal Star.

Heavy Damage Suffered By Farmers In Southern Saskatchewan

Insurance companies are very serious, according to insurance officials at Regina. Heavy damage has been suffered in districts where farmers have not been able to afford insurance.

According to C. C. Cook, president of the Farmers Mutual Life Insurance Company, about 100,000 acres have not been numerous but those which have been received are large.

Recent claims ranging up to 100 per cent. had been received from the district between Pangua and Moose Jaw following a hail storm in that district.

G. G. Hingler, secretary of the Saskatchewan Municipal Association, said.

Germany exported more aluminum products in 1931 than in the preceding year.

The U.S. Department of Agriculture has developed an "apartment" house for bees. It contains three stories.

The Alberta government has appointed a commission to study possible methods of health insurance in the province. The commission will report to the next session of the legislature.

From the misadventured bed where it has lain for 119 years, the "Tiger" American war vessel sunk in Penzance Bay, Ontario, can be raised without difficulty, Captain Robert Carson, Midland, Ontario, reports.

Three days after it went on the market, Ontario's \$20,000,000 bond issue was fully subscribed. The proceeds will be used to repay short term advances incurred for capital expenditures.

A floating university on a liner which sails from New York in the fall will touch 43 countries and 61 ports in its 39,000 mile tour of the world.

The British Government has no intention of returning to the gold standard in the immediate future. Neville Chamberlain, chancellor of the exchequer, told parliament.

Records for passenger air traffic between London and Paris were broken during the year just ended, 20,816 being carried as compared with 20,104 in 1928-29, the previous record twelvemonth.

New York's Leaning Tower

Unlike Wonder At Pisa It Leans Different Ways.

Perhaps few people know it, but New York City has its own "Leaning Tower," the new H. L. Hunt, and it is leaning toward the west. It was leaning toward the north, but far from being like the world wonder at Pisa, New York's tower leans sometimes one way, and sometimes another. When first it was being built, it was leaning toward the north, but accurate tests showed that the tower leaned to the south. To settle the question another test was made next day, and it was found that the tower leaned toward the west. It was finally discovered that the heat of the sun expanded the metal on one side or another, causing a variation of four inches at the top.

Soldier's Mother Honored

For the second time a woman has had the honor of reviving the Flame of Remembrance which burns day and night over the tomb of the French unknown soldier beneath the Arc de Triomphe. She was Madame Duval Arnold, wife of one of the members of parliament, who lost one of her five sons during the world war.

Not An Experiment

W. K. Kellogg says he desires to sell more of his cereal, so he is going to spend an extra million dollars in advertising. What's more, he will spend nearly all of it in newspapers. He's not experimenting, but merely following the plan on which he built his business.

Squash farming is a new venture in the Fraser Valley, British Columbia.

India's leading radio telegraph and cable services have merged.

Dr. DANDRUFF

and Falling Hair, use Minard's Dandruff. It will cure your hair. Use it three times a week and the world will be a better place.

Clean Head and Glossy Hair

MINARD'S "KING OF PAIN" INJINER

W. N. U. 1901

This Business Is New

British Columbian Rents His New Policy to Customers.

"Pay-as-they-lay" is the new policy upon which George McCreort, Bunsby-side poultry rancher, dispenses of hens. The plan enables a man without much capital to get into the poultry business by leasing hens.

Mr. McCreort had a customer in Vancouver for exceptionally large eggs. At current prices, McCreort could not supply the man with eggs and keep even with the feed man. He hit upon the plan of letting the customer have 100 hens on a rental basis.

"They do it with dress suits, radios, car batteries and drive-yourself autos, so why not with laying hens?" was Mr. McCreort's comment on the deal.

The result is that the hens earn Mr. McCreort a tidy return upon investment, and he is insured against charges for feed and housing. The man who rents the hens agrees to keep them in good health and to make good any hens lost through death or theft.

YOUTH LOVES A JACKET DRESS

BECAUSE OF ITS SMART SOPHISTICATED

And here is a saucy one. It has all the new features, including a built-up waistline, now so popular with young people.

The skirt is smartly cut with insets at the waist, and the front panel section, providing interesting flare to the hem.

The separate bodice jacket is the smart collarless type. It can be made with long or short sleeves.

A flag blue and white line made the original, with plain white lining contrast. The pet of white line had vivid orange-red insets.

Style No. 466 is designed for sizes 8, 10, 12 and 14 years. Size 10 requires 2 1/2 yards of 35-inch material with 14 yards of 35-inch contrasting.

Tub silk, balise print, cotton novelties in basket weaves, gay stripes, checks and dot motifs make up attractively in this cute model.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wire coin carefully.

Contract Bridge

By Hamlin B. Hatch, Olympic Champion, Cavendish Club, Toronto

The Responding Hand—Partner—should take all the wood implied in the fundamental factor in successful contract playing. And it is in the responses between partners that the precise truthful facts about the combined hands, are conveyed to the respective partners. This can be done quite accurately provided that the interference bidding. The purpose of this article is to show methods of correct response bidding predicated on the assumption that there is no interference bidding.

The original bidder opens the bidding with a bid of one. This bid immediately tells the partner of the bidder, that the bidding hand contains at least three or four high cards, and that the original bidder thinks that these high cards, under average conditions, will take from two to three tricks against any bid the opponents may make. The bid also says, that, in the declared suit, the bidder guarantees that he will take a minimum of four to five tricks, provided the deal is played in the original bid suit.

Normal expectancy in the responding hand is three taking tricks in the original bid suit, and then, with three or less taking tricks in the original declared suit, must deny the original bid by either a pass or another declaration. It must be firmly fixed in the mind of the bidder that it is on the correctness of the bid, and not on the correctness of the particular deal is based. And that also the function of the responding hand, is to bear the brunt of the bid.

The responding hand has four bidding possibilities provided there is no adverse bid. These are the raise, the pass, the takeout or the jump-shift or forcing bid.

The Raise—If it is decided to raise partner's suit, then the full raise should be given immediately. And the full raise is the number of taking tricks above the normal expectancy of three in the original bid suit. If one heart is the original declaration, and the responding hand will take five tricks with hearts trumps, and has normal length in hearts, the bid of the responding hand must be three hearts.

The Pass—If the responding hand contains no raise, no biddable suit, and less than one honor trick, the correct bid is pass. Hands which are freakish in distribution are exceptions. Freak hands may be bid with less than an honor trick.

The Takeout—This is a bid in another suit or no trump. It must, in the early stages of the bidding, be construed by the original bidder as a denial of the original bid. In effect it may not be a denial as the responding hand may have more than normal expectancy in the original bid, but may have a powerful suit of its own. In many cases the Takeout is made to find out if the hand "fits." If the hand does not support each other bid, the hand does fit and high contracts can usually be made.

A second takeout of the original bid is a definite denial and tells partner it is best not to play the hand in the original declaration. By neutral support a forcing response should not be made, as a rule, unless the forcing bidder has at least neutral support in the original declaration. By neutral support a forcing response should not be made, as a rule, unless the forcing bidder has at least neutral support in the original bid, when the forcing bid, der's suit is no strong, that, irrespective of the bid.

The One No Trump Takeout is the only weakness bid in contract in the first round of bidding. All other takeouts or bids, with the exception of the pass, are strength calls and convey definite high card information to partner. Generally the one no trump takeout is made when the responding hand has no biddable suit and only from one to two high cards, and sometimes not even one.

The hand, unless the original bidder has a very powerful hand, it suggests strongly that for this particular deal, the partnership must be satisfied with a partial score. Usually the no trump takeout places at least one high card in the no trump bidder's hand, but occasionally this no trump takeout should be made on a trickless hand. In other words the good player uses the one no trump takeout, whenever there is even a remote chance to better the bid, and to get into a bid which suits both hands better than the original bid. The following is an example. Original bid is one heart. Partner holds six spades to the ten spot, a singleton heart, three little minors and three little clubs. Partner bids one no trump, and on second round of bidding bids two spades. The hand is trickless with hearts trumps, but with spades trumps will take three tricks. Original bidder, after the one no trump and the subsequent two spade bid must pass unless exceptionally strong.

In a single cast three brothers, fishing in the harbor at Cork, Ireland, Free State, caught 52 salmon weighing 700 pounds.

SUNDAY SCHOOL LESSON

JULY 24

THE DELIVERANCE AT THE RED SEA

Golden Text: "Jehovah is my strength and song, and he is become my salvation."—Exodus 15:2.

Lesson: Exodus 13:17 to 15:21.

Devotional Reading: Psalm 97:1-7.

COOKING

Explanations and Comments

The Story From Egypt to the Red Sea, 13:17-14:12. The Israelites had assembled at Rameses in the eastern part of the Delta. From there the most direct route to Canaan would have been by way of the land of the Philistines northward to the Mediterranean coast and thence northward along the maritime plain of Canaan. That way would have involved a journey of not more than two hundred miles. But the people of Israel were not great warriors, and God led them not that way, "lest peradventure they repent when they see war, and they return to Egypt." Therefore, they took the longer route, a journey of the wilderness to the Red Sea.

Now the record tells us that Moses took the bones of Joseph with him. What greater proof than the presence of the bones of the murdered Joseph in his sarcophagus could the people have had of the truth of the story of their eventual settlement in the land of Canaan?

The march proceeded from Succoth to the wilderness of Shur, probably one of the great salt marshes of the Nile. There they encamped. Their constant guide by day was a pillar of cloud, and by night a pillar of fire, which "Jehovah went before them."

Now the Israelites were with them. At Elhanah the host turned around, keeping the people behind them. If they came to Pi-hahiroth, where they encamped.

All is of God. If He bid wave His hand, the mists collect, the rain falls, and the sun shines. The mists collect, the rain falls, and the sun shines. The mists collect, the rain falls, and the sun shines.

Lo! he looks back from the departing cloud. —Leitgolf.

Roosevelt the Man

Brief Sketch Of The Democratic Presidential Nominee

The honorable and gallant gentleman, as British M.P.'s are called by their fellows, seemed the right phrase for Franklin D. Roosevelt as he stood before the Democratic convention in Chicago and accepted its nomination for president.

To one seeing him for the first time the degree of his physical infirmity, though he has made immense gains since stricken by infantile paralysis seven years ago, was startling. He walked with painful slowness to the aisle, one hand on a stout cane and the other in the arm of his towering aide.

He had down from New York on a rough day and this, as air travel is still comparatively uncommon, in the first round of bidding. All other takeouts or bids, with the exception of the pass, are strength calls and convey definite high card information to partner. Generally the one no trump takeout is made when the responding hand has no biddable suit and only from one to two high cards, and sometimes not even one.

The hand, unless the original bidder has a very powerful hand, it suggests strongly that for this particular deal, the partnership must be satisfied with a partial score. Usually the no trump takeout places at least one high card in the no trump bidder's hand, but occasionally this no trump takeout should be made on a trickless hand. In other words the good player uses the one no trump takeout, whenever there is even a remote chance to better the bid, and to get into a bid which suits both hands better than the original bid. The following is an example. Original bid is one heart. Partner holds six spades to the ten spot, a singleton heart, three little minors and three little clubs. Partner bids one no trump, and on second round of bidding bids two spades. The hand is trickless with hearts trumps, but with spades trumps will take three tricks. Original bidder, after the one no trump and the subsequent two spade bid must pass unless exceptionally strong.

NEW INVENTION DOES AWAY WITH COOKING ODORS

Even fish and cauliflower bow down to Canpar Cookery Parchment

BETTER, CHEAPER AND EASIER

Canpar Cookery Parchment, a very ingenious invention, does away with the annoying odors. While cooking fish, it also retains flavor and food value. Cooking in Canpar actually prevents the famous French method of steaming and confining food and its flavor in the closed casserole.

You buy Canpar in a large envelope of handy sheets which may be pinned out and used over and over again because they won't absorb odors. When boiling vegetables you simply wet the Canpar and make a bag similar to a pudding bag. If you want to steam your fish, you use Canpar, strange food and seasoning, and prevent steam from dripping back. You can actually cook three vegetables at once in the same dish. This way you save fuel—and the flavors will not be lost.

Steamed, or boiled, fish comes out firm, solid and swimming in its own juice. No water. No sticky sauce. No burnt. Line your roasting pan with Canpar. Then the fat and juices can't burn. Meat is more succulent and there is no scorching or curling of the meat towards.

Many women use Canpar for a dish cloth. It is so silky and satisfactory, and doesn't spread like.

You'll never be without Canpar once you start using it. It saves time, money, and the health of your kitchen. Buy Canpar in the form of the famous PARSANI Heavy Waxed Paper in the Green Box.

Special Offer

Most grocers, druggists and department stores sell Canpar. If you don't find it, just send the coupon and we'll give you a Canpar. No sticky sauce. No burnt. Line your roasting pan with Canpar. Then the fat and juices can't burn. Meat is more succulent and there is no scorching or curling of the meat towards.

FOR THE FREER INTERCHANGE OF OUR PRODUCTS

Victoria, B.C.—The empire "down under" swung its forces up into Canada determined that Ottawa shall see the foundation of a greater commercial commonwealth, purposes which will in itself and leading the rest of the world back to economic re-establishment.

"It is unthinkable that it should fail," declared Rt. Hon. Stanley M. Bruce of the Australian delegation, concerning the imperial conference.

"The immediate question is whether our empire can, by common effort, reverse the trend and set us moving inward in the direction of the free interchange of our products," said Rt. Hon. J. G. Coates of New Zealand.

Declaring dependence on intra-empire trade is the only means towards the greater objective, which is to increase empire production, to stimulate every kind of empire enterprise, to provide more employment and as prosperity comes back to the world, to bring about a more economic distribution of the empire's white people.

"At this stage our chief joy and satisfaction is being in Canadian soil and meeting Canadian friends," said Hon. Downie Stewart, Minister of Finance and Customs, who, crippled in the war, says the financial distress of New Zealand from an invalid's chair.

Hon. A. W. Seymour, colonial secretary, arrived with the party, to represent the Fiji Islands.

Forest Ranger Murdered

Assaults Kill Government Official and Also Wound His Wife

Rosbarn, Man.—Lawrence Lee, young Dominion forest ranger, is dead, and his pretty wife is in the weeks lies in Clear Lake hospital, tonight as the result of a murderous raid on a forestry station in Riding Mountain forest reserve 14 miles north of here.

The ranger was murdered when unidentified assailants fired through the window of the station, the shot piercing his neck.

A few minutes later the slayers entered the cabin as Mrs. Lee was telephoning police officials. They ruthlessly shot her down, the bullet striking the back of her neck.

Taking Supplies To Northern Trading Posts

Pilot Buchanan, Veteran Aviator Making Trip Into Barren

Churchill, Man.—Taking off from the harbor here, Pilot J. H. Buchanan, a veteran northern trader, headed northwest into Windy Lake regions with supplies for the trading posts on the barren. He is flying a low-wing monoplane of the Canadian Airways. The craft has three tons capacity and a speed of 160 miles an hour. Pilot Buchanan was accompanied by Dave Glenn and Tom Gilmore, mechanics.

Bracken Elected

The Pas—Premier John Bracken was returned as the representative of The Pas in the Manitoba legislature on the basis of income returns, and with four polls resulted in Rupert's Land. Only small scattered parties in the northern districts remain unrepresented and the results in them cannot overcome Mr. Bracken's lead.

Will Not Affect Canada

Ottawa, Ont.—The decision of the Norwegian government to occupy a strip of territory in Greenland regarded only with academic interest here. The matter does not affect Canada, nor has any bearing on Canada's sovereignty over the islands of the eastern Arctic. Greenland has always been regarded by the Canadian government as Danish territory.

Unemployment Problem

Vancouver, B.C.—Taking exception to the British Columbia Government's proposed new direct relief plan, the executive of the Union of British Columbia Municipalities meeting here, decided to apply direct relief to a federal representative to study the unemployment relief problems of the province.

W. N. U. 1911

Duty On Free State Goods

Canada Stands To Benefit From Imposition Of New Levies
London, England.—The British Government has carried out its threat to levy fresh duties on goods from the Irish Free State. The revenue from the new duties will recoup the British treasury for the losses consequent on the Free State's default of land annuities.

The government's special measure passed by parliament gives the government the power to levy up to 10 per cent. ad valorem on Free State goods.

The Irish Free State commodities on which the new duties apply are principally livestock, poultry and game; butter, eggs and cream; bacon and pork.

There were reports the Canadian livestock trade in particular was already experiencing some benefit from the setback for the Irish exporters.

Need Of Action

Want No Prolonged Preliminary Plajver At Conference

London, England.—Touring western Canada at the present time, Lord Rothermere, English newspaper magnate, is losing no opportunity to stress the importance of the Imperial Economic Conference at Ottawa.

"The conference will feature a cable message from Lord Rothermere from Calgary with the caption 'Ottawa Must Dare and Do.' He declares the empire 'must do something'."

"If the delegates engage in prolonged preliminary plajver the conference will be choked in its own vomit," said Lord Rothermere says.

He declares that Canada can purchase within the empire £50,000,000 worth of goods which it has not now getting from outside the empire.

Ran On Saloon

Proposal Of U.S. Senator For Repeal Of 18th Amendment

Washington.—A resolution proposing a new constitutional amendment, repealing the 18th amendment, but outlawing the saloon, was introduced in the United States senate by Senator Carter Glass of Virginia, for years one of the leading supporters of prohibition.

Senator Glass asked for immediate consideration of his resolution, but this was blocked by Senator Norris, Republican, Nebraska.

The constitutional amendment proposed by the Virginia would allow states that want liquor to have it, but would keep the saloon unconstitutional. It also would prohibit transportation of liquor into states where it was forbidden.

Americans Hoard Cash

Stated That Billions Of Dollars Withdrawn From Circulation

University, Va.—Five hundred million dollars in "centuries and grand" has been withdrawn from circulation since the United States declared war, the underworld since Al Capone was arrested, and the seamy investigations in New York, said Walter D. Williams, economist, told the Virginia Institute of Public Affairs.

He estimated that Americans are hoarding \$2,000,000,000 in cash. This was withdrawn mostly in hundred, thousand and ten-thousand-dollar bills.

Plan Another Flight

Round The World Flyers May Make Second Attempt

Oklahoma City.—The possibility has arisen that Bennett Griffin and Jimmie Martin, who they tried in a "Hawaii" job, may step off the boat and into another "plane for a second attempt when they come back from Europe.

Efforts to have the second "plane available in New York are being made by Clarence Page, the flyers' business manager, Page said.

Subscriptions For Peace Park

Dunsmuir, N.D.—Canada and U.S. charged hands on the international boundary in Turtle Mountain Peace Park to commemorate the long friendship of their peoples. A \$5,000,000 fund is planned for it. Subscriptions of from five to 10 cents will be asked of Canadian and United States school children.

Elected President

Chicago.—Charles H. Swift has been elected president of the International Union, succeeding Edward F. Swift, deceased. The action was taken at a meeting of the Board of Directors in Buenos Aires, Argentina. Alder H. Swift was made vice-president.

Rumor Not Confirmed

No Declaration Regarding a Session Of Parliament In October

Ottawa, Ont.—Confirmation of the statement attributed to Dr. W. D. Stewart, (Cons., Long Lake), that a session of parliament would be called in October could not be secured here. The last word in that respect was the statement made by the Prime Minister in reply to a question by Rt. Hon. W. L. Mackenzie King in the House of Commons two days prior to propagation.

Declaring he would regard it as his duty to communicate to the House any conclusion arrived at by the Imperial Conference, Mr. Bennett said he was not in a position to make any statement regarding the re-assembling of parliament until after the conference had concluded its labors.

Was Ahead Of Schedule

First Inbound Ship Reaches Churchill Loaded With Freight

Churchill.—The first inbound freight of the season arrived here July 12, when the motor sailing vessel "Port Severn" arrived with furs, York Factory, Severn and Trout Lake. The ship is owned by the Hudson's Bay Company, Capt. O. Morris in command. Although heavy weather was encountered the schooner was not bothered and arrived here two days ahead of schedule.

The ship loaded at midnight with supplies for far north outposts. The "Ocean Eagle," government trawler, is on ice patrol north of the harbor.

BRITAIN AND FRANCE HAVE REACHED ACCORD

London, England.—Great Britain and France have agreed that in the future they will exchange views with complete candor on matters similar to those settled at the Lausanne Conference, Sir John Simon, secretary of state for foreign affairs, announced in the House of Commons.

"Of all, he said, they will co-operate in laying out the ground for a world economic conference. Then and thereafter they will keep each other mutually informed on any questions coming to their notice which may affect Europe as a whole. "It is to be hoped," said Sir John Simon, foreign secretary, "that other members of the empire and the country with this announcement in the House."

He emphasized this agreement had no connection whatever with relations between France and the United States or between Britain and the United States, specifically in respect to the war debts owed to America.

He thus made clear the second was not to be confused with the "gentlemen's agreement" signed by Britain, France and Italy at Lausanne which will hold the Lausanne reparations settlement in Germany.

"The United States has been heard from on the question of war debts revision. First of all, he said, they will co-operate in laying out the ground for a world economic conference. Then and thereafter they will keep each other mutually informed on any questions coming to their notice which may affect Europe as a whole. "It is to be hoped," said Sir John Simon, foreign secretary, "that other members of the empire and the country with this announcement in the House."

He emphasized this agreement had no connection whatever with relations between France and the United States or between Britain and the United States, specifically in respect to the war debts owed to America.

He thus made clear the second was not to be confused with the "gentlemen's agreement" signed by Britain, France and Italy at Lausanne which will hold the Lausanne reparations settlement in Germany.

"The United States has been heard from on the question of war debts revision. First of all, he said, they will co-operate in laying out the ground for a world economic conference. Then and thereafter they will keep each other mutually informed on any questions coming to their notice which may affect Europe as a whole. "It is to be hoped," said Sir John Simon, foreign secretary, "that other members of the empire and the country with this announcement in the House."

Barter Agreement

Suggestion Made That Coal Vessels From Britain Would Turn Back Wheat Cargoes

London, England.—The familiar suggestion that a barter agreement should be arranged between Britain and Canada so that British vessels taking British coal to Canada would secure cargoes of Canadian wheat was again made in the House of Commons by Mrs. Ida Copeland, Conservative.

Lord Bellingham, parliamentary secretary to the Board of Trade, said the suggestion was not practical. He had no information in regard to the nationality of the vessels in which either wheat or the 1,033,000 tons of British coal exported to Canada in the 12 months ending May 31, last, was carried, he said.

Mrs. Copeland asserted that most of the 30,000,000 bushels of Canadian wheat brought to Britain in the period mentioned were carried in foreign vessels, she said.

Mrs. Copeland asserted that most of the 30,000,000 bushels of Canadian wheat brought to Britain in the period mentioned were carried in foreign vessels, she said.

Back To Land Plans

Saskatoon Experts To Effect Big Savings In Relief Costs

Saskatoon, Sask.—Archibute Wilson, chairman of the committee in connection with the farm settlement scheme, reported to city council that a monthly saving in relief cost of \$4,750.00 would be made if the 1,336 applications receive the indemnization of the provincial government. Of the 1,336 applications, 211 were British, by birth, 28 naturalized Americans, 40 naturalized Americans, 33 foreign naturalized and 34 foreign naturalized.

Mr. Wilson in his report recommended that the regular sittings to interview applicants be discontinued.

New Alberta Loan

Provincial Issue Steadily Gaining Ground On British Market

Edmonton, Alberta.—Closing quotations on Alberta Government bonds, recorded on the London stock exchange, taken as evidence here that the provincial issue is steadily gaining prestige in the British market, the issue was first floated it received a cool reception.

"News of the gain received by the Alberta government bonds is very gratifying indeed," Hon. R. G. Hoek provincial treasurer, told the Canadian Press here.

ST. LAWRENCE SEAWAY PLAN IS APPROVED

Ottawa, Ont.—Canada and United States have agreed on final terms for construction of the St. Lawrence deep waterway scheme. Simultaneously, this announcement was made in Ottawa and Washington. Preparation of the treaty is under way and the document will be executed at an early date.

The United States Congress and Senate will probably give its official approval of the agreement before work is started. The Canadian parliament likewise will have to approve the treaty.

Long anticipated, the official announcement broke simultaneously in Ottawa and Washington. In the whole gamut of water engineering the project will be second only to the Panama Canal. Described officially as a means of improving and cheapening transport for a large part of the North American continent, carrying out of the project will enable vessels now commonly plying on the Great Lakes to reach the Atlantic.

SETTLEMENT OF EUROPEAN DEBTS MUST BE MADE

Paris, France.—The French foreign office has published the text of the "gentlemen's agreement" by which the principal powers concerned in the treaty of Lausanne agreed not to ratify that treaty until each had obtained a satisfactory settlement of its own debts.

The agreement was initiated by Great Britain, France, Italy and Belgium. It also provides that the Lausanne agreement shall not definitely go into force until they have been ratified as provided in the treaties themselves.

When a satisfactory arrangement has been made concerning their own debts, the gentlemen's agreement provided, including governments which ratify the general accords with Germany and these will become effective. If it is found impossible to obtain a debt settlement it was agreed to be in accord with Germany will not be ratified.

The foreign office also published the text of a letter received by Louis Germain-Martin Minister of Finance from Neville Chamberlain, British Chancellor of the Exchequer, indicating that Great Britain is prepared to the suspension of payment of France of her war debt annuities until the Lausanne agreement is ratified. It has been decided not to ratify it.

The Union Jack

Question Of A Distinctive Canadian Flag Is Raised

Ottawa, Ont.—Under present regulations, the Union Jack is the flag of Canada and the Red Ensign on sea. This was the statement from the state department when informed of remarks attributed to Col. W. H. Frost, Ontario Minister of Agriculture, on the need for a distinctive Canadian flag.

For years there had been advocacy of a new flag for Canada, and Hon. C. H. Caban, secretary of state, but nothing new had developed recently.

The question of a distinctive Canadian flag has been the subject of discussion in the House of Commons at different times for several years past.

Favorable Crop Report

All Crops In West Continue To Make Good Progress

Montreal, Quebec.—Reports from the prairie provinces continue to make good progress states the weekly crop report of the Bank of Montreal. During the past week, rains have been general and as moisture is ample, except in a few districts in Saskatchewan, warmer weather is now required.

Hail has occurred in some scattered districts of Saskatchewan and there has been some loss to crops from stem maggot and from grasshoppers in Manitoba, but the areas affected are not large. Pasture and the hay crop generally are good.

Will Seek Loan

City Of Calgary Needs Money To Carry On Relief Expenditures

Calgary, Alberta.—The city of Calgary will seek a \$1,000,000 loan from the Bank of Montreal immediately. It has been decided by city council, after financial advice from the city solicitor, that the city should consider borrowing. It was pointed out, and if the loan is obtained the city will be able to pay the city's debt of \$1,000,000, added by the promised \$250,000 support from the Dominion Government.

At present the city is in debt to the bank to the amount of \$1,700,000.

At present the city is in debt to the bank to the amount of \$1

Opportunity For Service

Out of the Welter Of War Has Grown a Greater Understanding.

The opportunity for service was never so great as it is now. The reason is that in the last few years, the world has changed.

Now, time and distance have been annihilated by science, and radical prejudices and fear have been changed into mutual confidence and understanding on the avails of the World War. I do not proclaim an ideal state, nor desire to suggest to positive an antithesis. I merely mean that in common suffering was found a greater capacity to see each other in a more generous light and to know each other in a more helpful way. I mean that, in this great companionship of men and youths of many nations, ideals and ideas we once believed peculiarly our own were found not much unlike those of our friends from other lands.

We learned that their hopes and aspirations were those we had ourselves. We came to believe that the things we had in common were greater far than those which divide us. Out of this fuller knowledge of one another, from this free and frank interchange of thought, has grown, as I say, a greater understanding and a finer sympathy, upon whose base may be reared and the sturdy structure of a common purpose.

Premier Bennett at Syracuse.

An Unique Will

Ontario Doctor Had a Very Fine Sense Of Humour

Toronto has some amusing wills in its records, one of which, written by a rhyming clergyman, may be seen in the Surrogate Court in Osgoode Hall. That of the well-known Dr. Dunlop Goodrich, O.E., is famous and often quoted. He was a man of rough-and-tumble humor.

Part of his estate was left to a sister "because she was married to a minister who she heeppes," and a share to another sister "because she is married to nobody now, she is like a bird, for she is an old maid." Also "I leave my late brother's watch to my brother Stanley, exhorting him at the same time to give up Whiggery, radicalism, and all other sins that do not easily best him." A friend is left "a silver teapot, to the end that he may drink tea therefrom, to comfort him under the affliction of a slatternly wife." To a third sister "because she is an old maid and pious, I give my silver cup, with a sovereign in it," also my grandma's snuff box as it looks decent to see an old woman taking snuff.

Troul Fishing In Saskatchewan

Great Success Has Attended Efforts Of Fish Culturists

Add Antelope Lake to the Saskatchewan waters where trout reared in an unfamiliar environment have thrived well.

Look Leven trout fingerlings placed in Antelope Lake by the Fish Culture Branch of the Canadian Government Department of Fisheries in 1929 had reached a length of as much as sixteen inches in 1931, although these game fish are not indigenous to this particular body of water. The case is another example of success met with by the fish culturists in introducing different varieties of fish into areas where they were previously unknown. Most of the work of the Canadian Government Fish Culture Branch is concerned with maintaining and increasing the stocks of commercial fish, but in a number of cases, in different provinces, the Branch has also given attention to efforts to widen the angling resources of the country, and what has happened at Antelope Lake is an instance in point.

How to make cast net ring, so that bells could be made from it, was once known to the Chinese, but is now a lost art.

"The stove smokes. What can I do?"

"Throw in a couple of those cigars you gave me. That will stop it!" — Wahne Jacob, Berlin.

W. N. U. 1931

Weird Inventions

Strange Ideas and Contraptions Revealed In U.S. Patent Office

People who have been looking for a tapeworm trap, an air-cooled rocking chair, goggles for their chickens, bullets that shoot around corners, or even a device for creating and maintaining dupes, are hereby referred to the United States patent office where specification of such articles are on file, stamped with the government's approval.

Two men have piled into the patent office records and out of their labors has come a compilation of strange inventions, which will be published under the title "Beware of Imitations." The contrivances have been designed for a wide variety of problems. There is, for example, a combination grocery's package, grape slicer and mouse and fly trap. A balloon propelled by harnessing eagles or vultures, patented in 1887, is pictured and described. There is a wreckless railroad train whose function is by the simple device of having tracks on top of the cars and ramps at either end so that if another train comes along, it will run up over the top and down again.

Two methods of awakening the comatose are included. One is an alarm clock which functions by pouring water on the sleeper's neck, while the other drops 80 or 100 wooden blocks on his face.

A self-cleaning derby hat, patented in 1896, contains a mechanism in the crown. The gentleman when the lady approaches, bows slightly, whereupon his hat tips by itself, leaving his arm free, presumably to fight off wild beasts.

An electric beehive extirpator is so designed as to "kill or startle" the bug in which case, "it will more likely change its mind and return to the hive than when it came."

In 1868 a novel idea of coffins was born. It was a turret at the head, extending to the surface of the ground, and is equipped with a small ladder for climbing out and a bell for attracting attention in case the occupant happens to be buried prior to desire. The problem of shoeing horses and cows on railroad tracks was solved in 1884 when a patent was issued for a locomotive attachment which throws a stream of hot water, some distance ahead of the wheels, so that the animals and warning them to stand their distance.

The tapeworm trap patented in 1854, is attached to a string and reel, which is attached to the inventor's words "the worm sees the bait, and its head is caught in the trap." All that remains to be done is to pull the string.

The air-cooled rocking chair is equipped with bellows beneath the seat and a smoke-blower fan running up the back and out over the rocker's head, so that he gets puffing of air on his impaled foot every time he shifts his position.

Edinburgh Floodlights

Stone Clearly Framed In Archway Gives Striking Effect

A flood-lighting scheme has been tried out in a very effective way at Edinburgh's Stone of Remembrance in front of the City Chambers in the High Street. Until recently the Stone was not as prominent at night as it might have been, merely sharing in the ordinary illumination of the arches in front of the City Chambers. In contrast, some time ago the Town Council decided to take action, and a powerful flood-light has been fixed in the arch above the Stone. The effect at night is striking, the Stone standing out clear and white, framed in the archway.

How He Knows

Father entered the room in a very nasty temper.

"Look here, Mary," he said to his wife, "that boy of ours has taken some money out of my pocket."

"Oh, Herbert, how can you say such a thing," reproved his wife. "You might as well accuse me."

"Not at all, Mary. It wasn't all taken."

Table salt and other valuable by-products are being obtained from the brine of a well in Oklahoma, used for cooling the condenser water of an oil refinery.

Picayune was the name of a one-cent coin.

Louisiana worth six and one-quarter cents.

Denmark's has notified all foreign jazz bands to leave the country.

CANADIAN WOMEN JOURNALISTS MEET IN ROCKIES

The Ontario delegation to the third triennial convention of the Canadian Women's Press Club, guests at the Banff Springs Hotel, paused for a photograph before exploring the beauties of the Canadian Rocky Mountains. In the group are: Mrs. Baxter, Detroit News; Miss Dickson, Mrs. Robson, Ottawa; Miss Margaret Grier, Ottawa; Miss Isabel Armstrong, Ottawa; Miss Eleanor Stevens, London; Miss Margaret McCormick, President Toronto Branch; Miss Charlotte Whitton, Ottawa, and Miss Lila Donahy, Kitchener.

Sailing Into the Arctic

Unique Expedition Set Sail For Land Of Eternal Snows

There is an expedition sailing into the Arctic that must be unique among the many expeditions that have voyaged amid Arctic splendours in recent summers.

This one now on the water is unique for several reasons. It is led by that Arctic veteran, Captain "Bob" Bartlett, who conveys a dual interest. For he goes Arctic-ward to erect a monument to the memory of Admiral Peary, and when Peary was on the trail to the discovery of the North Pole in 1909, Bob Bartlett was the white man he took farthest with him.

The Arctic has its terrors, but while they barely may be imaginable, their compensating amenities have become familiar. The women on the expedition had good-ly to this expedition accompanied Peary as his wife when he did his best geographical work in Greenland. She was at his headquarters at Inglefield Bay when the "Snow Baby" was born. And now the Snow Baby herself is returning in the Bartlett expedition to the scenes of those explorations of forty years ago.

Peary's daughter, Mrs. Stafford, has been invited to unveil the monument being erected to the Pole discoverer. Fittingly enough she takes with her her own two boys, Peary's grandsons. The gathering pertains almost of a home town reunion.

The materials for the monument are being transported by Capt. Bartlett, but he will pick up most of them at his home, at Brigus, Newfoundland. When he sets in there he will drop off a few presents for his mother. He has on board for her a Jersey cow and two pigs.

Did ever expedition so homely face the "terrors of the Arctic"? The thought must have occurred to Matt Henson, the white-haired negro who joined with Peary in wishing the voyage a pleasant trip. He recalled the day when he stood with Peary at the North Pole.

The more, in fact, you learn of the interesting Arctic expedition, the more you agree with Alice, the courier and courierier it grows. — Winnipeg Free Press.

Where Volcanoes Abound

Sea Floor Of Cook Strait Honey-combed With Craters

Huge craters of former volcanoes riddle the bed of Cook Strait, which divides the North and South Islands of New Zealand. Instruments obtained from the British Admiralty were used to trace the ocean bed and the chart reveals the floor of the ocean is honeycombed with craters of incalculable depth. The whole sea at some time has been shattered by eruptions and earthquakes.

Helping Him Out

Confused Shopper: "I want a pair of spec-rimmed hornies—I mean sporn-rimmed hornies—dash it! I mean heck-rimmed hornies!"

Pollie Floor-Walker: "I know what you want sir. Mr. Brown, show the gentleman a pair of iron-spruned beetles."

In the buildings of ancient Rome, nine different kinds of colored marbles were widely used, and many other rarer kinds were occasionally introduced.

Population of Russia is estimated at 147,013,000.

The potato contains 87 per cent water.

A New Eden

Leaves From Fig Tree May Be Used By Doukhobors On New Island Home

Nature has been kind to the Doukhobors who are to be interned on New Island and their dislike for modern ideas of dress. A fig tree has been discovered blooming amid the forest cover of the island.

According to officials supervising the construction compound here, the Sons of Freedom may, if they desire to abandon modern dress, they themselves with similar garments to those favored by Adam and Eve.

Just where the fig tree came from, or who planted it, is a mystery to officials, but they claim that it is large enough to supply a generous quantity of leaves for the clothing of the new residents.

Forming Corporation

Frank J. D. Barnum Will Carry On Forest Conservation Work

Frank J. D. Barnum, of Montreal, Annapolis Royal, N.S., and Victoria, is forming a corporation named the Barnum Forest Foundation, to carry on the forest conservation campaign and "save the big trees" movement inaugurated by him.

He has enlisted the support of his family together with the funds which he allocated to them in 1920 when he retired from business and divided his fortune between his family and his forest conservation fund.

By this method of financing his big tree purchases nothing will be diverted from his forest conservation work, so that both may be carried on at the same time.

Temperature To Order

Heating and ventilating engineers are working on a plan for the control of atmospheric conditions within the house. When perfected the average householder will be able to press a button in winter and produce a climate in his home rivaling the pleasant days of the southern and pleasant winter in summer to bring the invigorating and bracing air of the mountains and seashore to his abode.

Oil extracted from cherry pits is now becoming commercially valuable.

Greek music, the lyre and cithara being much more important.

Latvia has established import quotas for wheat and cotton.

FANCIFUL FABLES

Fewer Spinsters In The World

Number Of Women Increasing But More Enticing Marriage List

There are fewer spinsters in the world, and they are becoming fewer each year. Yet there are more women.

In Britain the marriage outlook for women is growing steadily brighter, for while 30 years ago 3,950 out of every 100,000 women in England remained single, the proportion is now down to 2,650, while in Scotland there has been a similar decrease.

Fifty per cent of the women in Australia and New Zealand were unmarried in 1901; now there are 45 per cent.

Denmark has fewer spinsters also, but Japan and Italy have increase in number.

There are 380,000,000 spinsters in the world, of whom Britain has 8,000,000, the United States 11,000,000, France 8,000,000.

America had 297 adult spinsters per 1,000 women in 1910. Ten years later there were 273, and now only 264 of them are spinsters. This despite the fact that for years more and more women have been in competition with boys in America.

In Germany the population was 37,700,000 in 1910 and 42,600,000 in 1925—an increase of 4,900,000.

But the number of unmarried women remained almost stationary, and in 1925 there were 26,000,000 of them, and in this 15 years of growing population only increased by 36,000.

In France today 44 women in 100 are not married, against 45.3 in 1920, despite the fact that the excess of women over men—the "surplus" women—has more than doubled since pre-war years.

There were 8,883,456 spinsters in France in 1921, and the figure fell to 8,690,000 in 1926. Married women numbered 4,689,000 in 1921, and 5,164,453 in 1926—an increase of 685,453.

These figures are of vital importance to every woman in the world—but no one seems to explain satisfactorily the paradox of more women and fewer spinsters.

There were more marriages of all ages in 1927 in England and Wales than in 1922—308,000 instead of 298,000—but there were fewer women married between the ages of 20 and 30—30,000 instead of 42,000.

In Scotland there are slightly more marriages in 1927 than in 1924, 28,585 instead of 28,510. But the number of marriages between the ages of 20 and 30 slumped from 5,113 to 4,676.

Why have women, according to statistics, a better chance of getting married?

Some experts say marriage is entered into more lightly and that thousands of men and women who would not otherwise, because their wives have employment and are self-supporting.

War On Crows

Saskatchewan University Fights That Annoying Bird

To settle the question as to whether or not the crow is more useful than the rooster, the University of Saskatchewan—and the result has brought about a renewal of the warfare against the large black birds.

Some persons contended the crowd lived largely on outcrops and other pests, while others believed they subsisted largely on grain and that their appetites were enormous.

Here is what six stomachs of crows contained: Six slabs, 46 maggots, many dry grass seeds, one head of a gopher, one scrap of meat, small scraps of carrion; and in three of the crows, from 22 to 70 kernels of wheat.

Down At South

At Fort Scott, Ontario, a farmer was looking at a \$17.50 suit in a show window. "I just marketed 243 pounds of wool," said the farmer, "and if my check for the pounds was just 30 cents higher I could buy that suit."

Only fathers could find the inventor of unbreakable drums for children.—Hans Humber, Madrid.

Keep Well with Eno's Help

If you are healthy, take ENO's. . . When you are not well, take ENO, for in most cases the beginning of all ailments is in the intestinal tract. ENO'S "Fruit Salt" rides the intestinal tract of all the accumulated poisonous waste matter. Be ENO conscious. Start taking ENO'S "Fruit Salt" to-day.

ENO'S FRUIT SALT

THE HOUSE OF DREAMS-COME-TRUE

—BY—
MARGARET FIEDLER
Author Of "The Splendid Fall," "The Herald Of The Sea,"
Hodder & Stoughton, Ltd., London.

CHAPTER XXV.—Continued

"See. Very well. I'll come to Okehampton by the three train tomorrow afternoon"—repeating his instructions carefully.

"Right. That's all fixed, then. I say. Mind you also fix a fine day—or night, rather! Goodbye."

A murmured farewell came back along the wire, and then Jean, replacing the receiver of his clip, ran off to apprize Lady Anne of the arrangements made.

"Lady Anne looked up from some village charity accounts which were puckering her smooth brow to smile approval.

"How nice, dear! Quite a charming plan—you'll enjoy it. Especially as there will be nothing to annoy you here tomorrow. I have two village committees to attend to—in a chair, so I must go. And Blaise, I know, is booked for a busy day with the estate agent. What Nick is going down to South Devon somewhere for a day's fishing. I think he goes down tonight. Really, it's quite unusually lucky that Judith should have faced on tomorrow for her moonlight party."

CHAPTER XXVI. Moonlight On The Moor

The moonlight, warm with its subtle fragrance of gorse—like the scent of peaches when the sun is shining on them—tonic with the faint glow of salt breeze by clean winds that had swept across the Atlantic, came to Jean's nostrils crisp and sparkling as a draught of golden wine.

Before her, mile after mile lay the white road—a sword of civilization cleaving its way remorselessly across the green wilderness of moony turf, and on either side rose the swelling hills and jagged peaks of the great moor, melting in the far distance into a vague, formless blur of purple that might be either cloud or tor as it merged at last into the dim haze of the horizon.

"Oh, blessed, blessed Moor!" exclaimed Jean. "How I love it! You know, half the people in the world haven't the least idea what Dartmoor is like. I was enthusing to a woman about it only the other day and she actually said, 'Oh, yes—Dartmoor. It's quite flat, I suppose, isn't it?'"

"Flat!"—with sweeping disgust.

Burke, his hand on the wheel of the big car which was eating up the miles with the facility of a box-car, continued to stare at the indifferent little snuff with which the speech was concluded.

"You don't like dead levels, then?" he suggested.

She shook her head.

"No. I like hills—something to look up to—to climb."

"Spiritual as well as temporal?"

"Why, yes, I think I do."

He smiled sarcastically.

"It's just that terrible antagonistic tendency of yours I complain of. It's too much for any mortal man to live up to. I wish you'd step down

to my low level occasionally. You don't seem to be afflicted with human passions like the rest of us"—he added, a note of irritation in his voice.

"Indeed I am!"

Jean spoke impulsively, out of the depths of that inner, almost unconscious self-knowledge which lies within each one of us, dormant until some lance-like question pricks it to spontaneous affirmation. She had hardly heard whether the conversation was tending, and she regretted her frank confession the instant it had left her lips.

Burke turned and looked at her with a curious speculation in his eyes.

"I wonder if that's true?" he said considerably. "If so, they're still asleep. I'd give something to be the one to rouse them."

There was the familiar, half-turbulent quality in his voice—the sound as of something held in leash. Jean sensed the danger in the atmosphere.

"You'd rouse one of them—the quite ordinary, commonplace one of bad temper who talk like that," she replied prosaically. "You've got to play fair, Geoffrey—keep the spirit of the law as well as the letter."

"All a fair in love and war—as I told you before," he retorted.

"Geoffrey"—indignantly.

"Years" mimicking her. "Well, we won't quarrel about it now. Here we are at our journey's end. Behind the carriage drive!"

The car swung round a sharp bend and then bumped its way up a roughly-made track which served to link a series of cobbled yard, constructed at one side of the bungalow, to the road along which they came.

The track cleared its way, rather on the principle of a railway cutting, clean through the abrupt acidity which flanked the road that side, and rising steadily between crumbling, overhanging banks fringed with coarse grass and tufted with straggling patches of gorse and heather, it emerged at last into a broad plateau. Here the road below was completely hidden from view; on all sides there stretched only a limitless vista of wild moorland, devoid of any sign of habitation save for the bare, crepe-like walls of the bungalow itself.

As the scene unfolded, Jean became conscious of a strange sense of familiarity. An inexplicable impression of having seen the place on some previous occasion, of familiarity with every detail of it—even to a recognition of its peculiar atmosphere of loneliness—took possession of her. Only she knew that it was associated in her mind with something disagreeable. Even now, as at Burke's dictation, she felt the car wheeling over the road, passing through the door to admit his guest by way of the front door, which had been secured upon the inside, she was aware of a feeling of intense repugnance.

And then, in a flash, recollection returned to her. This was the house of her dream—the nightmare vision which had obsessed her during the hours of darkness following her first meeting with Geoffrey Burke.

There stood the solitary dwelling, set amid a wild and desolate country, and to one side of it grew three wretched-looking, scrubby little fir trees, all of them bent in the same direction by the keen wind as they came sweeping across the Moor from

the wide Atlantic. Three Fir Bungalows! Why, the very name itself might have warned her!

Her eyes fixed themselves on the green-painted door, she knew quite well what must happen next. The door would open and reveal Burke standing on the threshold, she watched it with fascinated eyes.

Presently came the sound of steps, then the grating noise of a key turning stiffly in the lock. The door was flung open and Burke strode across the threshold and came to the side of the car to help her out. Jean waited, half terrified, for his first words. Would they be the words of her dream? She felt that if he chance to say jokingly, "Will you come into my parlour?" she should scream.

"Go straight in, will you?" said Burke. "I'll just run the car round to the garage and then we might as well get tea ready before the others come. I'm starving, aren't you?"

The spell was broken. The every-day commonplace words brought with them a rush of overpowering relief, sweeping away the dreamlike sense of unreality and terror, and as Jean nodded and responded jaily, "Absolutely famished," she could have laughed aloud at the ridiculous fears which had assailed her.

The inside of the bungalow was in charming contrast to its somewhat forbidding exterior. The living-room, furnished very simply but with a shrewd eye for comfort, communicated one with the other by means of double doors which, usually left open, obliterated the cramped feeling of the comparatively cramped room. The room might otherwise have produced, while the two lattice windows which each boasted were augmented by French windows opening out on to a verandah which ran the whole length of the building.

Now, having delightedly explored the front portion of the bungalow, joined Burke in the kitchen, guided rather by the clinking of crockery and the cheerful crackle of a hearth fire, he was awakened into fresh life by the scientific application of a pair of bel-

"I had no idea you were such a domesticated individual," she remarked, as she watched him carefully washing the brown earthenware teapot as a preliminary to brewing the tea while she busied herself making hot buttered toast.

"Oh, Judy and I are independent up here, I assure you," he answered with pardonable pride. "We never bring in the servants from Wilton here, but cook for ourselves. A woman comes over every morning to do the 'chores'—clean the place, and wash up the dishes from the day before, and so on. But beyond that we are self-sufficient."

"Years" mimicking her. "Well, we won't quarrel about it now. Here we are at our journey's end. Behind the carriage drive!"

The car swung round a sharp bend and then bumped its way up a roughly-made track which served to link a series of cobbled yard, constructed at one side of the bungalow, to the road along which they came.

The track cleared its way, rather on the principle of a railway cutting, clean through the abrupt acidity which flanked the road that side, and rising steadily between crumbling, overhanging banks fringed with coarse grass and tufted with straggling patches of gorse and heather, it emerged at last into a broad plateau. Here the road below was completely hidden from view; on all sides there stretched only a limitless vista of wild moorland, devoid of any sign of habitation save for the bare, crepe-like walls of the bungalow itself.

As the scene unfolded, Jean became conscious of a strange sense of familiarity. An inexplicable impression of having seen the place on some previous occasion, of familiarity with every detail of it—even to a recognition of its peculiar atmosphere of loneliness—took possession of her. Only she knew that it was associated in her mind with something disagreeable. Even now, as at Burke's dictation, she felt the car wheeling over the road, passing through the door to admit his guest by way of the front door, which had been secured upon the inside, she was aware of a feeling of intense repugnance.

the wide Atlantic. Three Fir Bungalows! Why, the very name itself might have warned her!

Her eyes fixed themselves on the green-painted door, she knew quite well what must happen next. The door would open and reveal Burke standing on the threshold, she watched it with fascinated eyes.

It does pay to "ROLL YOUR OWN"

From the standpoint of economy—each 25c. package of Turret Fine Cut contains the makings for at least 50 cigarettes—and Chantecler cigarette papers free.

From the standpoint of real smoking pleasure, there's nothing like rolling your own with the smooth, mellow, fragrant Virginia tobacco that you get in the Turret Fine Cut package.

It does pay to roll your own with Turret Fine Cut.

15¢ and 25¢ packages
—also in 1/4 lb.
vacuum tin

TURRET
FINE CUT
Cigarette Tobacco

FREE Chantecler cigarette papers with every package.

"Geoffrey! Do you know it's exactly six o'clock! I'm certain something must have happened. Judy and the Hoffords would surely be here by now if they hadn't had an accident of some sort."

Burke looked at his watch.

(To Be Continued.)

Measure Of Defense

Norway To Occupy Strip Of Greenland For Protection Purposes

The Norwegian Government has decided to occupy a strip of southern Greenland, two miles wide, between latitudes 60 degrees 30 minutes and 60 degrees 40 minutes. The occupation, said an official statement, is a measure of defense which Norway has been forced to take, Denmark having given police authority to its expeditions to east Greenland this year. The statement also said that in late years Danish authorities have tried to close west Greenland to foreigners and thus prevent whaling and fishing of the open sea from calling at Greenland ports for water.

THE RHYMING OPTIMIST

By Aline Michaille

THE DOLE OF LOVE

The beggar cried: "A crumb, a crust! By weakness I am crumb! My pride is humbled in the dust. I hunger and I thirst!"

Then eager hands and gentle hands Reached forth to give him aid. This weary wretch from foreign lands, By life's strange turns betrayed.

It is so easy to be kind To those we do not know; It is so easy to be kind To our next-door neighbor's woe.

A stranger's mournful tale will move Us till the quick tear starts; But ah! the scanty dose of love We give to hungry hearts.

By love the spirit must be fed If it would grow and thrive, Love is the meat and drink and bread Which keeps the soul alive.

Salt placed in the water will preserve the freshness of flowers.

By Lydia E. Pinkham's Vegetable Compound

Too "Worn-Out" to go
Another day broken . . . Could it stay on her first minute longer! Lydia E. Pinkham's Vegetable Compound always relieves aching. Try it, next month.

Little Helps For This Week

"My voice shall Thine hear in the morning, O Lord"—Psalm v. 3.

Lord, in Thy light, oh, let me walk today. By Thy love prompted, act and speak, and pray.

As a new creature it becomes to do, Whom sin it is, in all his words and ways.

To set forth daily thy Creator's praise, And new in heart, in life be also new.

—Lyons Domestic.

From the night our spirit awakens unto Thee, O God! For Thy precepts are a light unto us. Teach us, O God, Thy righteousness, Thy commandments, and Thy judgments. Enlighten the eyes of our mind that we may not be brought into death. Drive away all darkness from our hearts. Vouchsafe us the Sun of righteousness. Guard our lives from all reproach by the seal of Thy Holy Spirit. Guide our steps in the way of peace. Grant us to behold the dawn and the day with joyfulness, that we may give up our prayers to Thee at eventide.—Thomas A. Kempis.

Market For Honey Could Be Extended

If People Used It For Other Meals

Thus, Breakfast.

If you want to know what the public think of honey, put it on the table before a group of representative people. If they need be breakfast, the honey is likely to be a popular dish; if any other meal, it will probably be ignored. Recently a group of a dozen young ladies were observed at the evening meal. Honey was on the table, but not one of them touched it. The following morning, when a group of these same girls sat down to breakfast, every one of them ate a spread for cakes or bread for breakfast. The public regards honey as a spread for cakes or bread for breakfast. Not one person in a dozen knows any other use for it. If honey is to find its proper place in the world's market, we must find ways to extend its use beyond a spread for breakfast cakes.

A pleasant medicine for children another Gravel Mixture, and it is excellent for driving worms from the system.

Authority On Drugs

In these days of rapid progress in medical science, it is interesting to reflect that Dioscorides who wrote his "Materia Medica" in the first century A.D., recognized the recombinant authority on drugs for 1,600 years.

Raising the average child in the average family until it is 18 costs its parents about \$7,300.

Real jewels again are vogue in London.

New Form of Illumination

A new light has been invented which, it is said, may soon change the history of electric lighting. The illumination is produced by carbon dioxide gas, introduced into clear glass tubes under proper electric current, produces a steady white light having all the qualities of daylight. Carbon dioxide gas is not poisonous, as is carbon monoxide gas, used for heating and illuminating.

Remove all callouses and enlargements from your stock with Douglas Egyptian Foot-powder, a wonderful remedy.

Cotton and cotton goods lead in merchandise exports from the Philippines last year.

Plaster of Paris is made by heating gypsum, a chalk limestone, in a kiln.

"LOCK YOUR DOOR ON BIRTHDAYS!"

SAYS

HUGH TREVOR
Famous Screen Star

"The woman who would to win and hold a husband should keep young," Hugh Trevor says.

"To keep youthful and charming youthful guard complexion beauty. A skin as fresh as the fragrance of youth is always alluring," the lovely actress told "The Chronicle."

Keep regularly as "The Chronicle" says.

In Hollywood on Broadway, Europe, they remain young, charming and beautiful. Hugh Trevor says.

That is why Lock Your Door on Birthdays is the dressing room of the great film studios. Your skin will respond to it. The care of the skin is the key to the French soap for just 10c a cake!

Pains In Stomach and Bowels So Bad Would Have To Sit Down

Mrs. G. Landry, Montclair, N.J., writes—"I can easily remember Dr. Fowler's Extract of Wild Strawberry for cramps or pains in the stomach and bowels."

"Last Summer I had such awful pains in my stomach, and lower part of my bowels, at times, I would have to sit down. I took Dr. Fowler's and it was relieved. When my children were small I always kept a bottle of it in the house, and it helped them wonderfully whenever any of them had low complaints."
